1 SCOPE

1.1 Identification

This Software Version Description (SVD) describes the METCAST Server (MCSRVR) Segment of the METCAST data distribution software, Release 3.2.0.0 (Solaris Version) developed by Fleet Numerical Meteorology and Oceanography Center (FNMOC), Monterey, CA. This software was compiled with the Defense Information Infrastructure (DII) Common Operating Environment (COE), software version 4.4. The software runs under the following hardware and operating system:

- Sun Enterprise 250 or higher computer running the Sun Solaris operating system, release version 2.8.

This document has been developed in accordance with the *DII COE Developer Documentation Requirements, Version 2.0*.

1.2 System Overview

METCAST is a standards-based, request-reply and subscription (channel) system for distributing weather information over the Internet using Hyper-Text Transfer Protocol (HTTP) and Multipurpose Internet Mail Extensions (MIME). The METCAST Server Segment is responsible for processing requests for data from METCAST Clients, interfacing with a database to attempt to satisfy each request, and formatting the retrieved data as specified in the request before returning the data to the client. The METCAST Client comprises a separate segment.

1.3 Product Information

1.3.1 Product Qualification

Test and Evaluation (T&E) of the software were performed at Fleet Numerical Meteorology and Oceanography Center (FNMOC), Monterey, CA, prior to delivery of the software.

1.3.2 Product Restrictions

Intellectual property rights to deliverables defined in this document are covered by the copyright license under the clause in DFARS 252.227-7013 (Nov. 1995).

1.3.3 Product Dependencies

The METCAST Server segment interfaces with the Tactical Environmental Data Server (TEDS), Release 4.1 or higher, to retrieve gridded and observation data. The following TEDS segments must be installed before METCAST Server is installed:

- MAGRID – Grid Field Data API Segment
- MDGRID – Grid Field Data Database Segment
- MALLT – Latitude-Longitude-Time Observation API Segment
- MDLLT – Latitude-Longitude-Time Observation Database Segment
- MAIMG – METOC Imagery Data API Segment
- MDIMG – METOC Imagery Database Segment

Installation procedures for these segments are listed in Section 2. Note that TEDS also requires installation of Informix on the server.

The full METCAST Server installation requires three segments: MDCHNL (the METOC Channels segment), MDMETC (the observation database segment) and MCSRVR (METCAST Server itself). **These segments must be installed in the following order:**

1. MDCHNL
2. MDMETC (**NOTE:** This segment requires version **2.0.0.0 / 9.21** of the Informix On-Line Dynamic Server (INFXSF) segment. If INFXSF 2.0.0.0 / 9.21 is not present on the system, this segment should not be installed. MCSRVR can still be installed, but will not have access to observations.)
3. MCSRVR (must be installed last, but requires MDMETC only if observations are to be processed).

2.2 Non-Government Documents

None.

3 VERSION DESCRIPTION

3.1 Inventory of Materials Released

All physical media and associated documentation for the METCAST Server Segment are listed below.

- METCAST Server Segment v3.2 Installation CD-ROM for the Sun Enterprise 250 or higher computer running DII COE 4.4 and the Sun Solaris operating system, release 2.8.
- METCAST Server Segment v 3.2 Series Installation Procedures (IP), dated 10 August 2001
- METCAST Server Segment v 3.2.0.0 Software Version Description (SVD), dated 10 August 2001

3.2 Inventory of Software Contents

A listing of all executables and environment files delivered is contained in Appendix A of this document.

3.3 Changes Installed

There are no SCRs for MCSRVR v3.2; the only changes installed have been evolutionary minor bug fixes.

3.4 Waivers

There are no waivers associated with this software.

3.5 Adaptation Data

There are no site-specific data for the METCAST Server segment.

3.6 Installation Instructions

The METCAST Server Segment v3.2 Series Installation Procedures (IP) referenced in Section 2 of this document provide comprehensive installation instructions for the METCAST Server Segment. The fully installed segment occupies approximately 200 MB of disk space. The software requires a minimum of 8 MB of RAM, with 16 MB recommended (above the operating system requirements).

3.7 Possible Problems and Known Errors

Known problems and errors with METCAST Server software are listed in Appendix C of this document.

4 NOTES

4.1 Glossary of Acronyms

COE	Common Operating Environment
DII	Defense Information Infrastructure
FNMOC	Fleet Numerical Meteorology and Oceanography Center
GUI	Graphical User Interface
HTTP	Hyper-Text Transfer Protocol
INFXSF	Informix Server Foundation Segment
IP	Installation Procedure
IP	Internet Protocol
METCAST	METOC Broadcast
METOC	Meteorological and Oceanographic
MIME	Multipurpose Internet Mail Extensions
PC	Personal Computer
SRS	Software Requirements Specification
SVD	Software Version Description
T&E	Test and Evaluation
TCP	Transport Control Protocol
UM	User Manual

APPENDIX B Changes Installed

The h/mcsrvr/grids/bin/gridxml program was modified to support a sub-center id parameter. This is used primarily in the DAMPS installation.

This page intentionally left blank.

APPENDIX C Known Problems and Errors

Metcast Client for Unix Servers: The speed with which mouse inputs are made in the Metcast Client for Unix may cause problems and hang-ups. In general, fast single or double clicking ahead of the software with either the left or right mouse buttons may cause a hang up or other problem. Users should not click ahead of the Metcast Client program, but wait for the Client to complete the requested action before initiating (clicking for) the next action.
